

insight dashboards

Know all the answers?

What's going on, what went on and how do I improve?

Pasara's robust Business Process Management software provides a backbone to integrate 'best in class' tools, such as insight dashboards, to optimise your online experience

Multiple data feeds from your disparate systems and even multiple vendors can easily be consolidated to give you one complete picture; the view you need to understand and drive business compliance throughout your supply chain.

Find out what is holding you up, what is going wrong and what can't be delivered on time, free from the day-to-day emotion and influences: just deal with the facts.

Discover the impact any changes made are having on your processes; drive continuous improvement (particularly aligned to six-sigma methodology).

Insight dashboards from Itarus are designed to deliver management KPIs that are important to your business, empowering you to make fast and informed decisions based on real-time facts and trends.

Report on-time and act with confidence

Free up your time to do what is most important to you; no more seemingly endless hours waiting for information, collating data, generating reports to discover the truth: everything can be there at your fingertips and in real-time.

Producing accurate reports with "Insight" is no longer time consuming for managers. Each tailored Insight Dashboard initially provides 'just enough' data for each user, relevant to their business function, and by quickly assessing this single consolidated view of their key metrics they are immediately alerted to potential business critical issues. Each easy-to-understand graph, chart or gauge can also provide drill down data in order to identify root causes and support reliable decision-making.

Know all the answers

It's good to be green!

Don't settle for making decisions based on yesterday's data. As business moves faster and faster, anticipating tomorrow's problems today has never been more business critical.

Itarus OnlineServices is a suite of configurable and integrated software products that empower you to manage, control and automate prepress functions and in doing so deliver compliant packaging content globally at the point you need it!
